Sources

457 references, each printed once. Every reference the library cites, once: numbered, grouped by the document that cites it first, each with its body, title, date, where it is used and its web address, and an index by body. Each volume still lists its own sources in short, with the S-number beside each; this document gives the full entry.

How to Use This List

READ THIS IF YOU…

- want to check a figure against the page it came from;
- are writing about the plan and need the full citation;
- found a link in the library that no longer opens.

WHAT THIS LIST IS

I would rather a reader check us than take our word for it. So here is every reference the library cites, once, in one place.

Each has a number, S.1 onwards, and sits under the document that cites it first, in the library's order: the Plan, then the companion volumes, and last the series behind the Technical Paper. A reference only a list prints (a list of who already helps, say) follows the ones the text cites, in the list's own order.

Each entry gives the body that published it, the title, the date, where in the library it is used and its web address. Where there is no address, the entry says so: the source came to us as a document, or is a scheme or a record with no page of its own.

Each volume still prints its own sources, in short, with the S-number beside each, so a reader of one volume can find the full entry here. The index at the end lists every entry by the body behind it: NEA, MSE, MOM, NHB, MCCY, Parliament, IPS, UNESCO, the press and the academics.

THE THREE MARKS

Three marks run through the library, and the Technical Paper prints one beside every parameter (G.1).

Official. A published figure, from a source listed here, rounded only as the source rounds it.

Derived. Our arithmetic on official figures. The sources it starts from are listed here; the working is in the document that prints the figure.

Assumption. Ours, not taken from any source. It is marked as such and varied in the models (Method, Levers and Data, F.2 and F.3). No entry here can stand behind it, and none pretends to.

IF A LINK IS BROKEN

Web pages move. Ministries redesign their sites, and a reply that was at one address in October can be at another by March.

The addresses here were read between August and October 2026, most of them in the last week of October; each volume's sources note gives its dates. If one fails, search for the title and the date, which are given in full for that reason, or try an archived copy of the address.

Then tell us the S-number, through the contact address at hawker.siliconwok.com, so the next version can mend it. A broken link is a small thing. A claim no one can check is not.

S.1–S.242

First Cited in the Plan

The references the Plan cites before any later document of the library does, and those only its own list prints, in the list's order.

The Plan's references open with a note on the context of its sources, printed here as the Plan wrote it; each source it names is an entry below.

A note on these sources

This list says where each fact comes from; it does not say how sure we are of it. Each companion volume's sources note names the claims in it that could not be confirmed independently, and the Technical Paper marks every parameter official, derived or assumption (G.1). Read the entry here with the note there.

INDEPENDENCE

Version history

VERSION	DATE	WHAT CHANGED	TAG
1.9.3	1 November 2026	Plain that the time-bound body was the UNESCO nomination committee, not FMAS, which is a standing federation; MCCY's reply of 7 Oct 2026 stated exactly; a constructive tone towards NEA; no proposal or figure changes.	v1.9.3
1.9.2	1 November 2026	Uncle James on every cover, in place of the full name; no proposal or figure changes.	v1.9.2
1.9.1	1 November 2026	The site address and contact are Silicon Wok's; no proposal or figure changes.	v1.9.1
1.9	1 November 2026	The library is stewarded by Silicon Wok; no proposal or figure changes.	v1.9
1.8	31 October 2026	A pen name, Uncle James, and an anonymised note from the author; no proposal or figure changes.	v1.8
1.7	30 October 2026	Plain words: nine numbers settled and the 285 hardest sentences rewritten; no proposal or figure changes.	v1.7
1.6	30 October 2026	Four open calls settled: NEA already staggers the rent on assignment, so the HSS ask narrows to writing that stagger into the Scheme's terms; the 2012 Panel reported in April 2012; MOM's own rules answer the foreign-worker question, so it is recorded as a fact; and Liang Eng Hwa's 2018 question on hawkers managing their own centres is credited.	v1.6
1.5	29 October 2026	Three doors: the Plan cut from 72 pages to 44, with a card for every proposal; A becomes The Record; volume G, The Technical Paper, comes from the models; Your Table is for diners.	v1.5
1.4	29 October 2026	The record: the Government's own panels, Official Reports and UNESCO report read first, hawker pay ($1,470 a month in 2021) and a day shut for illness ($372) reckoned, ten reassurances answered, the count kept as distributions with one body to own it, the Regulars' List counted in orders with a Year 0 baseline, and the Government's match now covering part of the base (40%).	v1.4
1.3	29 October 2026	Grounded: the library's claims checked against sources (314 checked; corrections made where the evidence differed); four proposals change to fit the evidence; Follow the Plate adds the middlemen and the plate over time.	v1.3
1.2	28 October 2026	Restructured, with no change to any proposal, figure or claim, as a library of standalone documents: the Executive Summary, the Plan (the case and the proposals, Part VII in brief) and six companion volumes, A to F, each opening with who should read it, its bottom line and how it connects. The Main Paper and the Technical Paper end; their sections move, with new ids, into the Plan and the volumes.	v1.2
1.1	27 October 2026	First revision: who already helps hawkers beyond Government, and where the plan joins, defers or fills (§1.3.1–§1.3.2); hawkers' protection compared with four other kinds of worker in the Executive Summary; the retirement match applies under 55, beside the existing scheme from 55; the pilot widens from one Lighthouse Centre to two Lighthouses from Year 1, Chinatown Complex and Geylang Serai, and Tekka from Year 2, five at most before the gate, each costed from its own heritage-worthy stalls and size: $14,990,340 over four years in two-part ledgers (operating and programme); the plan pays for no hawker-centre infrastructure, and apprentices learn at the master's side instead of in a prep co-operative; hawker-led Buying Circles (§2.12), a table-cleaning fee re-priced for tray return at the pilot centres and a named deputy for an hour a day join the package; a Heritage Watchlist (§3.6) opens at every government hawker centre from Year 1 and counts each year the stalls at risk, and from Year 4 each centre funds new Fellowships at a maintenance rate fed by that count.	v1.1
1.0	27 October 2026	First edition: one document in three papers, the Executive Summary, the Main Paper and the Technical Paper.	v1.0

Versions are numbered major.minor. A new major version is a new edition, made with contributors or reviewers beyond the initiator; a minor version changes a proposal, a term or a headline figure, or restructures the documents by the initiator alone; a third digit marks a correction to wording or sources that changes none of them. Each version is tagged in the repository, and its PDF can be rebuilt from that tag. The PDF's file name never changes; the version on the cover, in the footer and on this page is the one that counts. Every change since 1.0, with the sections it touches and why, is recorded in the Version and Change Control Log published beside the library.
